# Superb Conditions For Fine Wines

Quality, Design and Innovation

LIEBHERR

Optimum humidity: Liebherr wine cabinets guarantee an optimum humidity and this ensured the corks are supple in place whilst still allowing the wine to breathe in its maturing process.

LED lighting: The tinted glass door provides not only a perfect UV protection, but also an optimum glance at wine. The integrated LED lighting ensures a pleasant illumination of the complete interior.

Wooden shelves: The wooden shelves are ideal for storing Bordeaux bottles. They can be stored in opposite directions to make full use of the capacity.

The **WKb 1712** wine cabinet, our most compact model from the Barrique series, can store up to 60 Bordeaux bottles. This unit ensures a constant temperature that can be set between +5 °C to +20 °C. Wines are stored optimally on three untreated height-adjustable wooden shelves. The activated charcoal filter is easy to replace and provides optimal air quality. Thanks to a tinted insulated glass door, high-quality wines are well protected from UV radiation. The LED lighting ensures that the interior is illuminated evenly and pleasantly so wines can be presented with illumination even over a longer period. The ergonomic slimline door handle with integrated opening mechanism ensures that the door is quick and easy to open with very little effort.
